Technical Specification of NVivo 14:

A comprehensive qualitative data analysis software that helps researchers and analysts organize, analyze, and gain insights from unstructured data. Here are the technical specifications:

Features and Capabilities:

1. **Data Import and Organization:**

- Import a wide range of data types, including text documents, PDF files, audio recordings, video files, images, and social media data.

- Organize and manage data through hierarchical folders and coding systems.

- Apply metadata and annotations to data sources for better categorization.

- Eliminates the file conversion process when working on both MacOS and Windows.

- Real Time collaboration with project updates syncing from the cloud to users' local machines.

- Online/Offline functionality that will allows users to continue working when they lose internet connectivity.

- Collaboration cloud for users to transfer projects to the cloud for team collaboration (common project file)

- Import bibliographical data from reference management software like EndNote, Mendeley, RefWorks or Zotero

- - a web browser extension for Internet Explorer: to collect web pages, online PDFs, social media data and YouTube videos and then import

- to collect web pages, online PDFs, social media data and YouTube videos and then import

- Import Facebook wall posts and comments from people, organizations or groups.

- Import Tweets from Twitter. For example, include a particular word, phrase or hashtag, or Tweets by a particular user. • Import LinkedIn group discussions

- Import survey responses directly from SurveyMonkey.

2. **Coding and Analysis:**

- Code data sources using different coding methods (e.g., thematic coding, case-based coding, or mixed methods coding).

- Utilize powerful search capabilities to find specific segments of text or media files.

- Explore relationships between codes and data through visual representations, such as charts and matrices.

- Conduct advanced queries and create reports to summarize and analyze coded data.

- automatic coding features to quickly group social media data—for example, group Facebook wall posts by conversation, or group Tweets by hashtag.

3. automatic visualizations for Facebook, Twitter and LinkedIn datasets to help you see patterns in your data

4. compound queries to search based on multiple criteria.

5. **Collaboration and Teamwork:**

- Share projects and collaborate with team members Collaboration Cloud.

- Assign different roles and permissions to team members for controlled access.

- Merge and reconcile multiple project versions to ensure data integrity.

4. **Visualizations and Reporting:**

- Visualize data and coding patterns through various chart types, including word clouds, tree maps, and cluster analysis.

- Generate comprehensive reports and summaries of analysis findings.

- concept maps, network diagrams, charts.

- Export visualizations and reports in various formats, such as PDF, Word, Excel, or HTML.

- cluster analysis to visualize the similarities and differences in your sources or nodes.

- two-way connections between items and display them visually with 'connection maps' to help you identify any patterns.

5. **Integration with External Tools:**

- Integrate NVivo with other data analysis tools, such as Excel, SPSS, and EndNote.

- Import survey data from online survey platforms like Qualtrics and SurveyMonkey.

- Export charts, models and visualizations as images to use in presentations or documents.

6. **Transcription and Audio Analysis:**

- Transcribe audio and video recordings within NVivo using automated transcription services or manual transcription.

- Analyze audio data through features like speaker identification, speech recognition, and transcription synchronization.

7. **Project Security and Privacy:**

- Ensure data security through encryption and secure login credentials.

- Control access and permissions to data sources and project elements.

- Comply with privacy regulations, such as GDPR and HIPAA.
